Subject Index

Volume 89, July 6–December 7/21, 2001

A

Accessory proteins

Molecular Interactions Between Two Long-QT Syndrome Gene Products, *HERG* and *KCNE2*, Rationalized by In Vitro and In Silico Analysis, 33

Acetylcholine

Acetylcholine, Bradykinin, Opioids, and Phenylephrine, but not Adenosine, Trigger Preconditioning by Generating Free Radicals and Opening Mitochondrial K_{ATP} Channels, 273

Association Between Polymorphism in the Chemokine Receptor CX3CR1 and Coronary Vascular Endothelial Dysfunction and Atherosclerosis, 401

Actin binding protein

Interaction Between PEVK-Titin and Actin Filaments: Origin of a Viscous Force Component in Cardiac Myofibrils, 874

Action potential

Action Potential Characteristics and Arrhythmogenic Properties of the Cardiac Conduction System of the Murine Heart, 329

Molecular Interactions Between Two Long-QT Syndrome Gene Products, *HERG* and *KCNE2*, Rationalized by In Vitro and In Silico Analysis, 33

A Novel Mechanism for Myocardial Stunning Involving Impaired Ca^{2+} Handling, 831

Acute coronary syndrome

Tissue Factor, the Emerging Link Between Inflammation, Thrombosis, and Vascular Remodeling, 1

Adenosine

Acetylcholine, Bradykinin, Opioids, and Phenylephrine, but not Adenosine, Trigger Preconditioning by Generating Free Radicals and Opening Mitochondrial K_{ATP} Channels, 273

Proteomic Analysis of Pharmacologically Preconditioned Cardiomyocytes Reveals Novel Phosphorylation of Myosin Light Chain 1, 480

Adenovirus

β_2 -Adrenergic Receptor Overexpression Increases Alveolar Fluid Clearance and Responsiveness to Endogenous Catecholamines in Rats, 907

Differential Activation of Mitogen-Activated Protein Kinase Cascades and Apoptosis by Protein Kinase C ϵ and δ in Neonatal Rat Ventricular Myocytes, 882

Adenylyl cyclase

Protein Kinase A Transgenes: The Many Faces of cAMP, 938

Adhesion

Angiopoietin-1 Reduces VEGF-Stimulated Leukocyte Adhesion to Endothelial Cells by Reducing ICAM-1, VCAM-1, and E-Selectin Expression, 477

Adhesion molecules

Transforming Growth Factor- β_1 Modulates Oxidatively Modified LDL-Induced Expression of Adhesion Molecules: Role of LOX-1, 1155

β_2 -Adrenergic receptor

β_2 -Adrenergic Receptor Overexpression Increases Alveolar Fluid Clearance and Responsiveness to Endogenous Catecholamines in Rats, 907

Protein Kinase A Transgenes: The Many Faces of cAMP, 938

Regulation of Thyroid Hormone Receptor Isoforms in Physiological and Pathological Cardiac Hypertrophy, 591

A TREK-1-Like Potassium Channel in Atrial Cells Inhibited by β -Adrenergic Stimulation and Activated by Volatile Anesthetics, 336

Upregulation of Functional β_1 -Adrenergic Receptor in the Failing Canine Myocardium, 599

Adrenergic signaling

When Is cAMP Not cAMP? Effects of Compartmentalization, 373

β -Adrenergic stimulation

Power Output Is Increased After Phosphorylation of Myofibrillar Proteins in Rat Skinned Cardiac Myocytes, 1184

Adrenomedullin

Adrenomedullin Induces Endothelium-Dependent Vasorelaxation via the Phosphatidylinositol 3-Kinase/Akt-Dependent Pathway in Rat Aorta, 63

Adventitia

Contribution of Adventitial Fibroblasts to Neointima Formation and Vascular Remodeling: From Innocent Bystander to Active Participant, 1111

Adventitial fibroblast

Trophic Effect of Norepinephrine on Arterial Intima-Media and Adventitia Is Augmented by Injury and Mediated by Different α_1 -Adrenoceptor Subtypes, 815

Afferent and efferent arterioles

Differential Expression of T- and L-Type Voltage-Dependent Calcium Channels in Renal Resistance Vessels, 630

Aging

eNOS Activity Is Reduced in Senescent Human Endothelial Cells: Preservation by hTERT Immortalization, 793

Akt

Adrenomedullin Induces Endothelium-Dependent Vasorelaxation via the Phosphatidylinositol 3-Kinase/Akt-Dependent Pathway in Rat Aorta, 63

Myocardial Protection by Insulin at Reperfusion Requires Early Administration and Is Mediated via Akt and p70s6 Kinase Cell-Survival Signaling, 1191

Alternative splicing

Replacement of the Muscle-Specific Sarcoplasmic Reticulum Ca^{2+} -ATPase Isoform SERCA2a by the Nonmuscle SERCA2b Homologue Causes Mild Concentric Hypertrophy and Impairs Contraction-Relaxation of the Heart, 838

Alveolar solute transport

β_2 -Adrenergic Receptor Overexpression Increases Alveolar Fluid Clearance and Responsiveness to Endogenous Catecholamines in Rats, 907

4-Aminopyridine

Heteromultimeric Kv1.2-Kv1.5 Channels Underlie 4-Aminopyridine-Sensitive Delayed Rectifier K^+ Current of Rabbit Vascular Myocytes, 1038

Angiogenesis

Drilling for Oxygen: Angiogenesis Involves Proteolysis of the Extracellular Matrix, 195

Hsp90 and Caveolin Are Key Targets for the Proangiogenic Nitric Oxide-Mediated Effects of Statins, 866

Increased Ischemia-Induced Angiogenesis in the Staggerer Mouse, a Mutant of the Nuclear Receptor Ror α , 1209

Integrin and Growth Factor Receptor Crosstalk, 1104

Integrins in Vascular Development, 566

Modulation of Endothelial Cell Growth Arrest and Apoptosis by Vascular Endothelial Growth Inhibitor, 1161

Number and Migratory Activity of Circulating Endothelial Progenitor Cells Inversely Correlate With Risk Factors for Coronary Artery Disease, e1

Proangiogenic Effect of Angiotensin-Converting Enzyme Inhibition Is Mediated by the Bradykinin B_2 Receptor Pathway, 678

Regulation of Matrix Metalloproteinase Activity in Ischemic Tissue by Interleukin-10: Role in Ischemia-Induced Angiogenesis, 259

Transcriptional Regulation of Vascular Development, 380

Tubes, Branches, and Pillars: The Many Ways of Forming a New Vasculature, 645

Vascular Morphogenesis and Remodeling in a Human Tumor Xenograft: Blood Vessel Formation and Growth After Ovariectomy and Tumor Implantation, 732

Vascular Morphogenesis and Remodeling in a Model of Tissue Repair: Blood Vessel Formation and Growth in the Ovarian Pedicle After Ovariectomy, 723

Angioplasty

Impaired Hyperpolarization in Regenerated Endothelium After Balloon Catheter Injury, 174

Angiopietin

- Abnormal Balance in the Angiopietin-Tie2 System in Human Brain Arteriovenous Malformations, 111
- Angiopietin-1 Reduces VEGF-Stimulated Leukocyte Adhesion to Endothelial Cells by Reducing ICAM-1, VCAM-1, and E-Selectin Expression, 477

Angiotensin

- In Vitro Evidence for an Intracellular Site of Angiotensin Action, 1138

Angiotensin-converting enzyme

- Proangiogenic Effect of Angiotensin-Converting Enzyme Inhibition Is Mediated by the Bradykinin B₂ Receptor Pathway, 678

Angiotensin-converting enzyme inhibitor

- Gene Expression and In Situ Localization of Diacylglycerol Kinase Isozymes in Normal and Infarcted Rat Hearts: Effects of Captopril Treatment, 265

Angiotensin II

- ERK and p38 MAPK, but not NF- κ B, Are Critically Involved in Reactive Oxygen Species-Mediated Induction of IL-6 by Angiotensin II in Cardiac Fibroblasts, 661
- Molecular Basis for Angiotensin II-Induced Increase of Chloride/Bicarbonate Exchange in the Myocardium, 1246
- Novel Competitive Inhibitor of NAD(P)H Oxidase Assembly Attenuates Vascular O₂⁻ and Systolic Blood Pressure in Mice, 408

Angiotensinogen

- In Vitro Evidence for an Intracellular Site of Angiotensin Action, 1138

Animal models

- Effects of Estrogen on the Vascular Injury Response in Estrogen Receptor α , β (Double) Knockout Mice, 534

Anion exchange

- Molecular Basis for Angiotensin II-Induced Increase of Chloride/Bicarbonate Exchange in the Myocardium, 1246

Anisomycin

- p38 Triggers Late Preconditioning Elicited by Anisomycin in Heart: Involvement of NF- κ B and iNOS, 915

Annexin II

- Recombinant Annexin II Modulates Impaired Fibrinolytic Activity In Vitro and in Rat Carotid Artery, 1240

Antiarrhythmic drugs

- Cardiac-Specific External Paths for Lidocaine, Defined by Isoform-Specific Residues, Accelerate Recovery From Use-Dependent Block, 1014

Antioxidant

- Ascorbate Attenuates Atrial Pacing-Induced Peroxynitrite Formation and Electrical Remodeling and Decreases the Incidence of Post-operative Atrial Fibrillation, e32

Aortic smooth muscle cells

- Extracellular Nucleotides Induce Arterial Smooth Muscle Cell Migration Via Osteopontin, 772

Apoptosis

- Aging Enhances the Sensitivity of Endothelial Cells Toward Apoptotic Stimuli: Important Role of Nitric Oxide, 709
- Mice Lacking Inducible Nitric Oxide Synthase Have Improved Left Ventricular Contractile Function and Reduced Apoptotic Cell Death Late After Myocardial Infarction, 351
- Modulation of Endothelial Cell Growth Arrest and Apoptosis by Vascular Endothelial Growth Inhibitor, 1161
- Phosphatidylinositol 3-Kinase/Akt Signaling Controls Endothelial Cell Sensitivity to Fas-Mediated Apoptosis via Regulation of FLICE-Inhibitory Protein (FLIP), 13
- Rapid Reversal of the Diabetic Endothelial Dysfunction by Pharmacological Inhibition of Poly(ADP-Ribose) Polymerase, 684
- Reactive Oxygen Species Mediate Amplitude-Dependent Hypertrophic and Apoptotic Responses to Mechanical Stretch in Cardiac Myocytes, 453
- Two Faces of Nitric Oxide: Lessons Learned From the NOS2 Knockout, 289
- Untangling the Web: Specific Signaling From PKC Isoforms to MAPK Cascades, 847

Arrhythmia

- Homozygous SCN5A Mutation in Long-QT Syndrome With Functional Two-to-One Atrioventricular Block, e16
- Molecular Interactions Between Two Long-QT Syndrome Gene Products, *HERG* and *KCNE2*, Rationalized by In Vitro and In Silico Analysis, 33

Arteriogenesis

- Role of Ischemia and of Hypoxia-Inducible Genes in Arteriogenesis After Femoral Artery Occlusion in the Rabbit, 779

Arteriosclerosis

- Antiinflammatory and Antiarteriosclerotic Actions of HMG-CoA Reductase Inhibitors in a Rat Model of Chronic Inhibition of Nitric Oxide Synthesis, 415
- Role for Tissue Factor Pathway in Murine Model of Vascular Remodeling, 71

Artery

- Trophic Effect of Norepinephrine on Arterial Intima-Media and Adventitia Is Augmented by Injury and Mediated by Different α 1-Adrenoceptor Subtypes, 815

Aryl hydrocarbon receptor

- Constitutive and Inducible Expression of *Cyp1a1* and *Cyp1b1* in Vascular Smooth Muscle Cells: Role of the Ahr bHLH/PAS Transcription Factor, 573

Ascorbate

- Ascorbate Attenuates Atrial Pacing-Induced Peroxynitrite Formation and Electrical Remodeling and Decreases the Incidence of Post-operative Atrial Fibrillation, e32

Astrocyte

- Elevated Blood Pressure in Transgenic Mice With Brain-Specific Expression of Human Angiotensinogen Driven by the Glial Fibrillary Acidic Protein Promoter, 365

Atherogenesis

- Constitutive and Inducible Expression of *Cyp1a1* and *Cyp1b1* in Vascular Smooth Muscle Cells: Role of the Ahr bHLH/PAS Transcription Factor, 573

Atherosclerosis

- CD40 Signaling and Plaque Instability, 1092
- Clinical Imaging of the High-Risk or Vulnerable Atherosclerotic Plaque, 305
- Coronary Vasodilation and Improvement in Endothelial Dysfunction With Endothelin ET_A Receptor Blockade, 969
- Cytomegalovirus Infection Accelerates Inflammation in Vascular Tissue Overexpressing Monocyte Chemoattractant Protein-1, 1224
- eNOS Activity Is Reduced in Senescent Human Endothelial Cells: Preservation by hTERT Immortalization, 793
- Identification of Genes Potentially Involved in Rupture of Human Atherosclerotic Plaques, 547
- Inhibition of Transforming Growth Factor- β Signaling Accelerates Atherosclerosis and Induces an Unstable Plaque Phenotype in Mice, 930
- Interleukin-18/Interleukin-18 Binding Protein Signaling Modulates Atherosclerotic Lesion Development and Stability, e41
- Investigation of Relationship Between Reduced, Oxidized, and Protein-Bound Homocysteine and Vascular Endothelial Function in Healthy Human Subjects, 187
- Molecular Markers, Fibrous Cap Rupture, and the Vulnerable Plaque: New Experimental Opportunities, 471
- Novel Clinical Markers of Vascular Wall Inflammation, 763
- Phospholipase A₂ in Vascular Disease, 298
- The Pleiotropic Nature of the Vascular PPAR Gene Regulatory Pathway, 935
- Reciprocal Antagonism Between Estrogen Receptor and NF- κ B Activity In Vivo, 823
- Transforming Growth Factor- β : A Local or Systemic Mediator of Plaque Stability? 853
- Tumor Necrosis Factor- α Induces Fibronectin Synthesis in Coronary Artery Smooth Muscle Cells by a Nitric Oxide-Dependent Posttranscriptional Mechanism, 26

ATP

- Effects of Cytosolic ATP on Ca²⁺ Sparks and SR Ca²⁺ Content in Permeabilized Cardiac Myocytes, 526
- Ischemic and Pharmacological Preconditioning in Girardi Cells and C2C12 Myotubes Induce Mitochondrial Uncoupling, 787

ATP-sensitive K⁺ channel

- Characteristics and Superoxide-Induced Activation of Reconstituted Myocardial Mitochondrial ATP-Sensitive Potassium Channels, 1177

Atrial fibrillation

- Ascorbate Attenuates Atrial Pacing-Induced Peroxynitrite Formation and Electrical Remodeling and Decreases the Incidence of Post-operative Atrial Fibrillation, e32

Vascular smooth muscle cells

- Chlamydia pneumoniae* and Chlamydial Heat Shock Protein 60 Stimulate Proliferation of Human Vascular Smooth Muscle Cells via Toll-Like Receptor 4 and p44/p42 Mitogen-Activated Protein Kinase Activation, 244
- Constitutive and Inducible Expression of *Cyp11a* and *Cyp11b1* in Vascular Smooth Muscle Cells: Role of the *Ahr* bHLH/PAS Transcription Factor, 573
- Contribution of Adventitial Fibroblasts to Neointima Formation and Vascular Remodeling: From Innocent Bystander to Active Participant, 1111
- Heteromultimeric Kv1.2-Kv1.5 Channels Underlie 4-Aminopyridine-Sensitive Delayed Rectifier K^+ Current of Rabbit Vascular Myocytes, 1038
- High Glucose Impairs Voltage-Gated K^+ Channel Current in Rat Small Coronary Arteries, 146
- Increased Expression and Activity of RhoA Are Associated With Increased DNA Synthesis and Reduced $\text{p}27^{\text{Kip1}}$ Expression in the Vasculature of Hypertensive Rats, 488
- Innate Diversity of Adult Human Arterial Smooth Muscle Cells: Cloning of Distinct Subtypes From the Internal Thoracic Artery, 517
- Mechanisms of Telomerase Induction During Vascular Smooth Muscle Cell Proliferation, 237
- Molecular Composition of 4-Aminopyridine-Sensitive Voltage-Gated K^+ Channels of Vascular Smooth Muscle, 1030
- The Pleiotropic Nature of the Vascular PPAR Gene Regulatory Pathway, 935
- Phenotypic Modulation of Vascular Smooth Muscle Cells Induced by Unsaturated Lysophosphatidic Acids, 251
- Platelet-Derived Growth Factor Promotes the Expression of Peroxisome Proliferator-Activated Receptor γ in Vascular Smooth Muscle Cells by a Phosphatidylinositol 3-Kinase/Akt Signaling Pathway, 1058
- Role of the Sphingosine 1-Phosphate Receptor EDG-1 in Vascular Smooth Muscle Cell Proliferation and Migration, 496
- Targeted Overexpression of CCAAT/Enhancer-Binding Protein- δ Evokes Enhanced Gene Transcription of Platelet-Derived Growth Factor α -Receptor in Vascular Smooth Muscle Cells, 503

Vasculogenesis

- Integrins in Vascular Development, 566
- Transcriptional Regulation of Vascular Development, 380
- Tubes, Branches, and Pillars: The Many Ways of Forming a New Vasculature, 645

Vasodilation

- EDHF and NO: Different Pathways for Production—Similar Actions, 648

Ventricle

- HCN2 Overexpression in Newborn and Adult Ventricular Myocytes: Distinct Effects on Gating and Excitability, e8

Ventricular fibrillation

- Rectification of the Background Potassium Current: A Determinant of Rotor Dynamics in Ventricular Fibrillation, 1216

Ventricular myocytes

- Potential of Ca^{2+} Release by cADP-Ribose in the Heart Is Mediated by Enhanced SR Ca^{2+} Uptake Into the Sarcoplasmic Reticulum, 614

Ventricular remodeling

- Gene Expression and In Situ Localization of Diacylglycerol Kinase Isozymes in Normal and Infarcted Rat Hearts: Effects of Captopril Treatment, 265

Vesicle transport

- Increased Myocardial Rab GTPase Expression: A Consequence and Cause of Cardiomyopathy, 1130

Vitamin E

- Maternal Hypercholesterolemia and Treatment During Pregnancy Influence the Long-Term Progression of Atherosclerosis in Offspring of Rabbits, 991

Volatile anesthetics

- A TREK-1-Like Potassium Channel in Atrial Cells Inhibited by β -Adrenergic Stimulation and Activated by Volatile Anesthetics, 336

Voltage-dependent calcium channel

- Differential Expression of T- and L-Type Voltage-Dependent Calcium Channels in Renal Resistance Vessels, 630

Voltage-dependent inactivation

- On the Role of Ca^{2+} - and Voltage-Dependent Inactivation in $\text{Ca}_v1.2$ Sensitivity for the Phenylalkylamine (-)Gallopamil, 700

Voltage-gated K^+ channel

- Heteromultimeric Kv1.2-Kv1.5 Channels Underlie 4-Aminopyridine-Sensitive Delayed Rectifier K^+ Current of Rabbit Vascular Myocytes, 1038

- Molecular Composition of 4-Aminopyridine-Sensitive Voltage-Gated K^+ Channels of Vascular Smooth Muscle, 1030

Voltage-gated Na^+ channel

- Cardiac-Specific External Paths for Lidocaine, Defined by Isoform-Specific Residues, Accelerate Recovery From Use-Dependent Block, 1014

X**Xanthine oxidase**

- Oxidative Stress and Apoptosis in Heart Failure Progression, 198

Z**Z-disc signaling**

- The Complete Gene Sequence of Titin, Expression of an Unusual ≈ 700 -kDa Titin Isoform, and Its Interaction With Obscurin Identify a Novel Z-Line to I-Band Linking System, 1065
